

Why choose SUSE to move SAP S/4HANA to Google Cloud Platform?

Moving to SAP S/4HANA

To help meet today's challenges, SAP customers are moving to SAP S/4HANA — SAP's intelligent ERP — to transform their operations, infrastructure, and processes, and become Intelligent Enterprises.

Deploying on Google Cloud Platform

Google Cloud Platform (GCP) is

Innovative

Secure

Flexible

Scalable

And renowned for

Performance

Compute power

Availability

Reliability

Google shares our commitment to open source, with vast experience through projects like Kubernetes, and strategic partnerships with open source vendors

Gaining exceptional business value

Research shows organizations are gaining exceptional value from running their business-critical SAP applications on GCP.

Why businesses are choosing SUSE

SAP partner
20-year co-innovation partnership with SAP

Running on SUSE
85% of SAP HANA is deployed on SUSE

Endorsed by SAP
SUSE Linux Enterprise Server for SAP applications is endorsed by SAP and preferred by SAP customers

Used by SAP
SAP uses SUSE as one of its development platforms and in its production environments

Up to 64% saving
With Committed Use Discounts for Linux, with SUSE

Validated with SAP
Every SUSE Linux Enterprise Server for SAP applications release on GCP is validated for SAP HANA

Comprehensive support
Consulting, implementation and infrastructure support

Open source solutions
Performance-optimized automation tools and pre-configured solutions for infrastructure management, maintenance & trouble-shooting, and automated failover

Single dashboard to manage mixed Linux estates (including content lifecycle management)

Live patching, for kernel updates without reboots

Enhanced high availability and disaster recovery

Modern. Simple. Fast

Make a simpler, smoother, and faster migration to SAP S/4HANA on GCP with fewer risks and errors, plus maximized quality.

Modernize applications

Improve performance, security, reliability and availability

Simplify IT infrastructure and management

Minimize downtime, increase team productivity and drive innovation

Accelerate digital transformation

Improve agility and customer satisfaction as you become an Intelligent Enterprise.

Learn how we can help you make a faster and easier migration to SAP S/4HANA on Google Cloud Platform.
